

Knowledge forms winners

Make the first step into a successful future: A network of more than 20,000 Scientists are ready to assist you. Make the most of their intellectual potential and secure your industrial property rights, which can make you a winner in tomorrow's markets. Please feel free to contact us at one of our four competency centers.

Pharmaceutics |

Saarland University

Universität des Saarlandes
Wissens- und Technologietransfer GmbH
Dr. Annekathrin Seifert
Im Starterzentrum, Geb. A1.1
66123 Saarbrücken
a.seifert@univw.uni-saarland.de

Medical Engineering and Technology |

University of Freiburg

Campus Technologies Freiburg GmbH
Dr. Kathrin Lauckner
Stefan-Meier-Straße 8
79104 Freiburg
kathrin.lauckner@campus-technologies.de

Your contact partner will assist you: Fast, non-bureaucratic, providing all relevant information to your field of interest.

Sensor technology |

University of Tübingen

Eberhard Karls Universität Tübingen
Dr. Rolf Hecker
Alte Botanik Raum 102
Wilhelmstraße 5
72074 Tübingen

PIPE-The future begins now

“Pooling intellectual property efficiently”:

Protected industrial property rights, owned by more than 20,000 Scientists are waiting to provide you an innovation-lead in the cutting edge technology market.

Knowledge makes Markets

Four renowned German Universities united for a mutual goal: to pool present/future industrial property rights, to offer small and medium size businesses the opportunity to succeed in today's markets, without need for developing their own technologies.

Four University Core Competence Centers, each representing a different sector of the science spectrum, offer the chance to utilize their latest innovation.

Pharmaceutics |

Saarland University

The unique Industry has vast potential, however, is associated with the highest average cost for product development. Accordingly, patent protection is of utmost importance to recover soaring costs and developing reimbursement pressures.

Medical Engineering and Technology |

University of Freiburg

Medical Technology is one of the most innovative economic sectors. R&D costs are double compared to the industry standard. Approx. half the sales volume is created with products <3 years. The challenge of this fast-moving sector is: well-timed product placement.

Sensor technology |

University of Tübingen

This “key technology” stimulates innovations in a variety of sectors, e.g. Automotive-, Medical -, Buildings-, Communications- and Environmental Technologies, Chemistry, Pharmacology, Bioanalytics and Logistics.

Optic, Photonic, Photonic Imaging |

University of Göttingen

Traditionally, Optics/Photronics are of enormous importance for Basic Sciences, and have developed into a “next generation” technology of the 21st century. Progress and innovations of this cross-sectional technology has leverage effects in Laser-, Medical-, Nano-, Bio and Communications Technologies.

Knowing what knowledge is worth

How much value has an idea, how much economic potential? To assess this is the duty of the Patent Agency (PVA), who select ideas of interest for Private Industries, legally protect it and offer it to public markets, from patent filing to a successful commercial realization.

It therefore appears obvious, that the strategic alliance of the four universities strengthened their position by collaborating with six PVA's.

- _ CTF GmbH, Freiburg
- _ GINo GmbH, Kassel
- _ INNOVECTIS GmbH, Frankfurt
- _ ipal GmbH, Berlin
- _ MBM Science Bridge GmbH, Göttingen
- _ Saarland University WuT GmbH, Saarbrücken

**Your advantage: More Know-how and experts,
who know what knowledge is worth:
to strengthen your competitive position !**
